

## Bridging from TOGAF® 8 Certified to TOGAF® 9 Certified

---

The purpose of the bridging option is to enable individuals who are TOGAF 8 Certified to obtain TOGAF 9 certification.

The bridging option exists to recognize the existing investment in TOGAF certification for individuals who have achieved the TOGAF 8 Certified qualification.

Individuals who have qualified as TOGAF 8 Certified can bridge directly to the TOGAF 9 Certified qualification.

**NOTICE OF WITHDRAWAL: The Open Group will withdraw the TOGAF 8 – 9 Advanced Bridge Examination (Exam Reference OG0-9AB) on November 1, 2013. The date for last examinations at test centers is October 31, 2013.**

### Target Audience

---

- Individuals who have achieved the TOGAF 8 Certified qualification
- Individuals who require a deeper understanding of the TOGAF 9 standard
- Professionals who are working in an organization where the TOGAF 9 standard has been adopted and who need to participate in architecture projects and initiatives
- Architects who will be responsible for developing architecture artifacts
- Architects who wish to introduce the TOGAF 9 standard into an architecture practice
- Architects who want to achieve a recognized qualification to demonstrate their detailed knowledge of the TOGAF 9 standard

### The Value of this Certification

---

Individuals certified at this level will have demonstrated their understanding of:

- The differences between the TOGAF 9 and TOGAF 8.1.1 standards
- How to apply the ADM phases in development of an Enterprise Architecture
- How to apply Architecture Governance in development of an Enterprise Architecture
- How to apply the TOGAF Architecture Content Framework
- How to apply the concept of Building Blocks
- How to apply the Stakeholder Management Technique
- How to apply the TOGAF Content Metamodel

- How to apply the TOGAF standard recommended techniques when developing an Enterprise Architecture
- The TOGAF Technical Reference Model and how to customize it to meet an organization's needs
- The Integrated Information Infrastructure Reference Model
- The content of the key deliverables of the ADM cycle
- How an Enterprise Architecture can be partitioned to meet the specific needs of an organization
- The purpose of the Architecture Repository
- How to apply iteration and different levels of architecture with the ADM
- How to adapt the ADM for security
- SOA as a style of architecture
- The role of architecture maturity models in developing an Enterprise Architecture
- The purpose of the Architecture Skills Framework and how to apply it within an organization
